Overview.

Platform Aibo

Social Context Family

Physical Scenario Home environment

Social Scenario Pet that needs care

User Profile Target Child that need to be responsible

Roles Pet

Interaction.

● Modality of Interaction

- Motion
- Touching sensors
- Speaking
- Gestures

● Robot Ressources for Interaction

- Camera
- Infrared
- Paw sensors
- microphones
- touch sensors
- head, legs, tall, ears
- LED pannel
- speakers

Quality.

● Metrics to Assess Interaction

- Time in different emotions
- User feedback
- Parents feedback

● Quality

- Engagement of the child
- Attitude
- User satisfaction

Conclusions.

- An effort for child.
- Time to think if he wants an animal.
- Finally fewer abandoned animals.
